RE: Foreign Languages Building Garden Renovation

To the members of the SSC,

This letter is in support of the above project. Here at F&S, we are always looking to increase the aesthetics and performance of our landscapes. Due to some user and contractor issues, the plaza space with rooftop planters at FLB have been vacant for years now. As such, we are excited to work with students in addressing this issue and greening this austere space. The team on this project have been enthusiastic and diligent in their work and thought process here.

We look forward to a continued collaboration with this team as they assist campus in becoming more sustainable and environmentally friendly. This project has our support and we encourage the SSC to continue funding these initiatives.

Thank you,

A handwritten signature in black ink that reads 'Brent Lewis'.
