Project Description:

The Solar Decathlon is a biannual international competition hosted by the Department of Energy and the US Green Building Council to design, build and present a 100% solar-powered house on the National Mall in Washington D.C. The Illinois entry to the competition will consist of an interdisciplinary collaboration between three colleges: ACES, FAA and CoE, with additional involvement from students in Communications and Business. The 2007 team involved over 100 students. The SSC supports this educational experience and demonstration of UIUC as a leader in sustainable design. The SSC is allocating a total of \$30,000 for the Solar Decathlon 2009, with \$20,000 to be used for general purposes and \$10,000 to be expressly used for communications and educational outreach.
