

2010 Research Projects

There are four new research initiatives funded for this academic year.

Terrestrial carbon loss to aquatic ecosystems: pattern detection and hypothesis testing at the regional scale *Investigator: Jennifer Fraterrigo, Department of Natural Resources and Environmental Sciences*

The Impact of Gasoline Prices on Internet Purchases *Investigator: Andrea Martens, Department of Agricultural and Consumer Economics*

Seed Grant: US-European Collaboration on the Influence of Cultural Ecosystem Values on Agricultural Landscapes and Decision Making in the Context of Climate and Policy Change *Investigator: Courtney Flint, NRES*

Study of Cost Savings, Carbon Footprint, and Resource Reductions Associated with Green Business Certification *Investigator: David Wilcoxon, Division of Safety and Compliance*

Environmental change induced alterations in crop rooting drive impacts on carbon and water cycling *Investigator: Andrew Leakey, Department of Plant Biology*
