

Office of the Provost
Attn: Provost Linda Katehi
Swanlund Administration Building
601 East John Street
Champaign, Illinois 61820

February 1, 2008

Provost Linda Katehi:

We, the student leaders in the environmental movement, recognize the efforts that have been made toward creating a large wind turbine installation on our campus. As students we would like to express our continuing support of this project and excitement for its eventual realization.

We look forward to one day being able to utilize and demonstrate carbon-free clean energy generation on our campus. We are excited for the potential of this achievement to attract talented students who are interested in this critical field.

Through the initial allocation of seed funding from self-imposed student fees, the acquisition of contributions from the University and the Illinois Clean Energy Community Foundation, and the ongoing work of Facilities and Services, we have maintained our dedication to this project. We will continue to support this significant effort to improve our campus and global environment.

Respectfully,
Student leaders in the environmental movement

Note: This letter of support is also being given to Chancellor Richard Herman and Dr. John Dempsey.

Students who are leaders in the student environmental movement have been asked to show their support for wind energy on campus. Their signatures represent their personal opinions.
