Project Description:

One of the strategies outlined in the Illinois Climate Action Plan is a significant increase in the amount of solar energy on campus, which would include rooftop panels as part of the plan. Toward that end, SSC is funding an 11-kilowatt array on the roof of the Speech and Hearing Building. This specific location was selected due to its viability, visibility, and location near the heart of campus.

This proposal directly funds:

1. Overhead and design costs for the solar array
2. Solar panels for the array
