

Dear Marika,

Attached to this email, you will find our updated proposal for the Sheltered Bicycle Parking for CLSL and RAL Buildings. Many of these changes were made after consulting with Katie Kinley and Morgan Johnston. Here are the most significant changes:

- Derek Fultz is now our Financial Contact.
- The timeline has been modified to be more realistic.
- The budget has been split into two options. The first option is for one shelter, and the second option is for a *total* of two structures.
- The cost of the parking structure has been updated to reflect quotes received from professional organizations.
- We asked for additional support from the School of Chemical Sciences, the Department of Chemistry, and the School of Biomolecular Engineering. They have pledged a total of \$5,000 in addition to funding provided by the SSC.

#### Additional Information

We have contacted the Chair of the Architectural Review Committee, James Lev, and he will review our proposed structures next week.

Jonathan Sweedler, the Director of the School of Chemical Sciences, approves of our proposal and is the highest authority of those we have contacted. We have also contacted Ken Woodridge and Chad Stevens, who also approve of our proposal.

Best Regards,  
Geoffrey Chambers and Jonathan Eller
