

iCAP Working Group Agenda

Friday, January 27th, 2017

Present: Gary Kling, Joe Edwards, Scott Willenbrock, Sean Reeder, Ximing Cai, Rob Fritz, Morgan Johnston, Olivia Webb

0. Introductions with Ximing

1. Brief iCAP Portal overview by Morgan

2. Discuss any updates to Water002, Cooling Tower Increase COC

Instead of informally asking Robyn Deterding to bring this up to campus rec, we have decided to formally transmit it. Perhaps we should find groups for whom the work would be least disruptive, like those who are already doing HVAC work. Consider the Ice Arena, who is wanting to be more efficient.

The funding for the first cooling tower improvement likely came from IEPA, the building owner. Will be formally transmitted with a line from iWG.

3. Discuss Trans008, Bike Parking in Ramps

It was originally thought that this recommendation would be transmitted, but we have not received it yet. It is more correct to refer to it as “parking decks”, not “ramps”. The idea is to add cages around bike racks on parking decks to make them more secure.

4. Discuss updates to Econs004, Green Labs Coordinator

This recommendation needs to be discussed with the OVCR.

5. Consider issues with recommendation process and view recommendation tracker

Viewed Box file of recommendations.

What is the role of SWATeams? They should be empowered to provide persuasive cases for their recommendations and to track down the necessary information and connections, but sometimes iWG is better for this. No need to prescribe a certain action for every situation.

In what situations should teams formally transmit a recommendation? Consider allowing more back-and-forth between SWATeams, iWG, and the unit who will receive recommendation, allowing recs to become strong and SWATeams to feel more supported.
