

iWG Assessment

SWATeam Recommendation Ref #: PWR010

Date: 5/2/2017

Original SWATeam Recommendation: Publishing the Ethics Compliance Video concerning recycling including the paragraph summary.

iWG Assessment of budget and policy impacts (*check one*):

moderate budget and/or policy impact OR major budget and/or policy implications

iWG Routing Need (*check one*):

transmit recommendation OR forward to Sustainability Council

iWG Routing Direction (*department name or Council*): _____ iSEE _____

iWG Assessment: We concur. It would be good to promote this video to faculty and staff, as well as the students. The SWATeam also indicated that another video should be created, explaining the recycling process. We recommend iSEE reach out to F&S about developing such a video.

Individual comments are required from each iWG member (can be brief, if member fully agrees):

| iWG Member Name | iWG Member's Comments |
|------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ximing Cai (iSEE) | I (together with Morgan Johnston) will follow up with F&S for the development of the video and then post the video to the various units at campus via iSEE and F&S. I also wonder if we should promote the video via provost office. |
| Morgan Johnston (F&S) | F&S supports additional promotion of the recycling compliance video. We would be happy to provide content for a second video as described, but we do not have the staff resources to produce the video at F&S. |
| Robyn Deterding (Student Affairs) | On behalf of Student Affairs I support additional efforts to educate our campus on the recycling process. |
| Matthew Tomaszewski (Provost's Office) | Additional promotion is a good idea. A variety of delivery methods should be considered. |
| Gary Kling (Academic Senate) | A brief survey of some of my colleagues regarding our recycling system indicated to me that this is something we need. |
| Joseph Edwards (Student Sustainability Leadership Council) | I support this proposal. A video such as this could do well in educating our campus community on the University's recycling policy. |
| Sean Reeder (OBFS) | better explanation of how recycling is accomplished on campus is necessary. Multiple media/publication types could be employed. |
| Scott Willenbrock (Provost's Fellow) | Nice video, I saw it advertised on Eweek. |

Attachment D

| | |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Rob Fritz (college-level facility manager) | Recycling on campus can be confusing to many. A video would be a good means to clearly explain the process and clear up any misconceptions. |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|

Attach any comments from subject matter experts (with names and roles).
