

iWG Assessment

SWATeam Recommendation Ref #: Water005 Stormwater redesign

Date of iWG Assessment Started: 05/10/2018

Assessment Completed: 08-27-2018

Original SWATeam Recommendation: The appropriate campus units (Parking, Facilities and Services) should begin the process of implementing the award winning green stormwater redesign for parking Lot F4.

iWG Assessment of budget and policy impacts (*check one*):

moderate budget and/or policy impact OR major budget and/or policy implications

iWG Routing Need (*check one*):

more detailed study OR transmit recommendation OR forward to Sustainability Council

iWG Routing Direction (*department name, SWATeam, or Council*): Iowa Mwilambwe, Auxiliaries Services

iWG Recommendation: Do a feasibility study for lot F4, incorporating the green infrastructure from the conceptualization completed by the students in the award winning rainworks challenge. Potential funding could be requested from the Student Sustainability Committee (SSC).

Individual comments are required from each iWG member (can be brief, if member fully agrees):

| iWG Member Name | iWG Member's Comments |
|--|--|
| Ximing Cai (iSEE) | I support this recommendation. I hope Parking Department can conduct a feasibility study of the proposed re-design. If they eventual approves this recommendation, it will be a great example/model about students' contribution to campus sustainability. |
| Morgan White (F&S) | We support this recommendation. |
| Larry Uphoff (Student Affairs) | I support this recommendation based on funding approval from SSC. |
| Matthew Tomaszewski (Provost's Office) | I support the recommendation. |
| Scott Willenbrock (Provost Fellow) | I support this recommendation but only if there is serious intent on implementing the project (or something similar). Otherwise it is a waste of resources. |
| John Dallesasse (Academic Senate) | I would suggest that the feasibility study be preceded by a short study to understand the approximate cost to implement, and to follow with the suggested feasibility study if there is a plausible path to funding the project. |
| Nick Heyek (Student Sustainability Committee) | I support this recommendation |
| Sean Reeder (OBFS) | I support the recommendation. |
| Rob Fritz (college-level facility manager) | I support the recommendation of a professional feasibility study. The UofI <i>Campus Hydro Redesigned</i> team results should be a great kick-start for parking lot F4. |

| | |
|---|---|
| Joey Kreiling (Student Sustainability Leadership Council) | SSLC supports this recommendation and suggests that other financial sources should be allocated to incentivize the follow through of this project, assuming the feasibility study is favorable. |
|---|---|

Attach any comments from subject matter experts (with names and roles).

Comment from past SSLC co-chair Matt Moy:

I support the recommendation of the feasibility study, if there are already rough plans on how to implement the project should the study prove the project to be worthwhile.
