

### ICAP 2020 Water Sustainability Goals

- Reduce water use by 20-30% from a \_\_\_\_ baseline in process, irrigation, and potable water usage
- Complete water audit on campus buildings by \_\_\_\_
- Transparency in water consumption: publish water data from Abbott, chiller plants, and water consumption
- Improve and install water metering on campus buildings, chiller plants, and Abbott
- Laboratory upgrades: determine where once through cooling is used and meter autoclaves to get base line
- Benchmark water efficiencies of chiller plants and Abbott CHP
- Compare our averages with other institution
- Complete retro fitting of buildings with low flow water fixtures
- Investigate in finding ways to reuse water waste
- Water reclamation pond
