Turning a Brownfield into a Brightfield

[Inovateus Solar](#), a solar energy provider based in South Bend, Indiana, helped redevelop a site in Kokomo, Indiana, that for years housed a manufacturing plant operated by Continental Steel Corp. The 7.2-MW Kokomo Solar 1 array is located on land where a Continental facility produced nails, rods, wire, and fencing from scrap steel, operating through the Great Depression, and providing materials for the military during World War II.
