

ELECTRIC VEHICLE CHARGING ETIQUETTE

It is unacceptable for an internal combustion car to park at a plug-in parking spot

Refrain from parking here if the vehicle does not currently need to be charged

EV drivers are encouraged to download the ChargePoint mobile app to receive real-time updates on charging spot availability and the status of their vehicle's charge

When the vehicle is finished charging, move it to a regular parking spot. The ChargePoint app will send a notification when charging is complete

Do not unplug another car without permission from the owner

Properly hang the cord when finished charging to minimize tripping hazards

Charging for more than 4 hours is discouraged and will be reflected by an increase in charging rates after 4 hours. More information on pricing available at

https://parking.illinois.edu/parking_items/electric-vehicle-charging

Thank you

for supporting sustainability at Illinois and helping the environment by reducing emissions
