

## Seeking Input for Environmental Justice Plan

The University of Illinois and Champaign-Urbana community recognizes that there is a need to integrate racial equity, social justice, and environmental justice with sustainability. We are working together to develop an Environmental Justice Plan to foster a more equitable campus and community. The goal is to ensure that all people feel valued and protected in our environment, with equitable access to parks and natural spaces, city services (including health services, safe spaces, public transportation, food and water), and natural resources. While the Environmental Justice Plan will likely not yield direct implementation of programs, the Plan is important to guide our next steps, actions, and policies to work toward an equitable community. Let's work together to make this happen!

As we are working to strengthen our community resilience, we need your help! We are here to listen to your ideas and look forward to working together to improve the resiliency and equity of our community.

Please fill out this Google Form, email Sustainability Programs Coordinator Meredith Moore at [mkm0078@illinois.edu](mailto:mkm0078@illinois.edu), or call 217-333-0119 to provide your ideas, feedback, or input on how we can address and collaboratively develop solutions for these community-wide challenges.

- What does environmental justice mean to you?
- What is important to you in our community? What do you appreciate?
- Which issues do you think are most important to address?
- What tools, resources, programs, or spaces currently exist that makes you feel safe and included in this community?
- Do you experience any barriers to achieving a socially and environmentally just community?
- What tools, resources, programs, or spaces would help make our community more equitable and environmentally just?

Google Form Survey:

*Do we want to give multiple choice answers or fill in the blank?*

1. What does environmental justice mean to you?
2. Which three issues do you think are most important to include in the Environmental Justice Plan?
  1. Issues with or lack of infrastructure or facilities (parks, sidewalks, bike lanes, etc.)
  2. Lack of trees
  3. Health care access

4. Access to healthy food and/or clean water
  5. Extreme weather conditions/hazards (extreme heat/cold, storms, floods, hazards)
  6. Pollution (water, trash, air)
  7. Feeling safe
  8. Engagement between campus, community, residents
  9. Other – list your ideas!
3. What tools, resources, programs, or spaces currently exist that makes you feel safe and included in this community?
  4. Do you experience any barriers to achieving a socially and environmentally just community?
  5. What tools, resources, programs, or spaces would help make our community more equitable and environmentally just?

Please tell us about yourself!

1. What neighborhood do you live in?
2. How old are you?
3. Which race/ethnicity best describes you?
4. What is your education level?
5. How many people live in your household?
6. What is the total household income?
7. Was this survey easy to understand/complete?
8. Is there anything else you would like to share with us?
9. Would you like to sign up for the iSEE newsletter to stay up-to-date on sustainability projects, events, and initiatives? Include your email.
