April 26, 2023

Dear Jennifer, Morgan, and members of the iCAP Working Group,

Thank you for forwarding the iCAP Engagement Team recommendation 003 “Sustainability Ambassador Program” to iSEE.

I approve of this recommendation, and our Associate Director for Campus Sustainability has been engaging with University Housing over the last year to incorporate sustainability training into training for residential advisors. We see this recommendation as complementing these existing efforts to increase knowledge of campus sustainability goals and what part students can take in reaching those goals. Because the success of this program will depend on collaboration with University Housing, we would appreciate if this recommendation was also shared with them.

Thank you again, and please pass along our thanks to the Engagement Team for its work toward a more sustainable campus.

Sincerely,

Madhu Khanna
