## **Project Description:**

Students in the Department of Mechanical Science and Engineering have been working on projects to improve the sustainability of our campus. The Department has requested support to carry out to projects (designing a sump pump water collection and use system, and assisting with the retro-commissioning of Siebel Center), which will be high-impact projects and will involve students. Thus, the Student Sustainability Committee is in favor of funding them to the amount of \$6,000 (\$4,000 for the water project, and \$2,000 for the retro-commissioning project) – with the expectation that Computer Science will underwrite the remainder).
