Time to complete

Project Questionnaire

Please provide proper and accurate information.

1. Name of project *

CABBI Solar Panels

2. Date project received financial award letter *

December 4, 2023

3. Date of forecasted project completion *

June 1, 2024

4. Date of report submission *

May 8, 2024

5. Marketing and promotion efforts to date *

The greenhouse is still under construction and is expected to be up and running by June 1. At that time, we will have a posted sign near the solar panels that will highlight the SSC contribution to the project. During tours to key stakeholders within the University and external partners, we have highlighted the SSC contribution. At the grand opening in the fall, the SSC will also be recognized.

6. Please describe project progress *

The area over the geothermal field has been graded with landscape fabric and rock applied. All solar panels have been installed. We are currently finishing the interconnection and installation of the electrical panel. We then will install the fence around the solar array.

7. Please describe how your project integrates student involvement and community outreach *

In addition to giving students the opportunity to conduct research in a state of the art greenhouse space partially powered with solar energy, this solar array will be an easily accessible example of SSC's investment in bringing our campus closer to carbon neutral. We have 3 full-time students beginning to work in the greenhouse over the summer and will have 6 RISE Interns (intern program with students from underrepresented groups in STEM) getting hands-on experience in the greenhouse this summer.

Project Documentation

8. Please upload updated financial documentation for your project

<https://studentengagement.illinois.edu/student-sustainability/ssc/docs/SSC-Supplemental-Budget-Timeline.xlsx> *
