This project is to restore native flora around the Lincoln Avenue Residence halls. The project is in agreement with the campus-approved plant selection list. The chosen flora species will have additional functionality to serve as a pollinator garden for native insects. The project was approved on the condition that the project team leads must collaborate with Brent Lewis from Faculty & Services to ensure proper functionality of land plotting and irrigation. The project hopes to generate resilient landscape strategy data for the iCAP. The project will serve as a learning opportunity for students to gain grant writing experience and knowledge of sustainable agriculture. The project will begin in the Summer of 2023 and has functionality and maintenance plans until May 2025.
