Time to complete

1. Date of this semester progress report submission \*

2025-01-10

2. Name of project exactly as it was listed in your award letter \*

Soil boring database for UIUC campus

3. Date of original award letter \*

2022-05-21

4. Date of expiration listed on award letter (or on scope change approval if more recent) \*

2025-12-31

5. How much was your award (i.e., original award plus any approved budget increases)? \*

7,500.00

6. How much of your award has been spent to date (in dollars)? \*

4107.72

7. Date of forecasted project completion \*

2025-12-31

8. Have you submitted one or more semester progress reports previously? \*

☒ YES☐ NO

9. Describe, in detail, what has been completed on the project since the last semester progress report (or since the project commenced if you have not yet submitted a semester progress report)? \*

In the Fall of 2024, I, Tessa Kleiner, joined the project to do work for Andrew Stumpf. Since starting, I have gone through all of our online and paper files which included 172 reports of multiple soil borings and assigned them report numbers. I made sure each report had all the soil borings we could account for and assigned each of those API numbers. After that, I started inputting soil boring locations and surface data into the online database. I got through logging around 210 soil boring locations this semester. I will be back next semester (Spring 2025) to continue my work.

10. Describe, in detail, the project's challenges/obstacles since your last semester progress report (or since the project commenced if you have not yet submitted a semester progress report)? \*

Some of the challenges/obstacles we have faced have been finding the exact location of borings on some of the older reports. Another challenge is that some of the reports in our files did not have all the borings they should have included. Lastly, we also faced some challenges with inputting data into the new database that required some troubleshooting with the staff.

11. Describe, in detail, the project's successes since your last semester progress report (or since the project commenced if you have not yet submitted a semester progress report)? \*

Since the beginning of the semester, I have gone through all our recorded soil boring reports on campus and in the surrounding area and given them report numbers. I also assigned API numbers to each of the soil borings in each of the reports. We have started going through the reports and putting basic location data, for example, section, township, range, building number, and depths for each boring hole into the newly created database.

12. Did your project have any changes to its team that SSC should know about (e.g., project lead, faculty/staff advisor, departmental financial contact)? \*

**NOTE: If yes, please complete the SSC Project Contact Information Change Form located at this link: <https://forms.office.com/r/uBjx9nmNpG>**

☐ YES

☒ NO

13. Complete and upload the semester financial documentation for your project. You should reflect all expenditures since your last semester project report. We strongly suggest that you also upload supporting financial documentation from Banner for your award CFOP. NOTE: When your project is completed and/or expired (whichever comes first), any remaining project funds will be transferred back to the SSC.
