Project Description:

This project aims to help meet iCAP energy conservation goals and provide a sustainable environment for student based activities. By replacing inefficient and broken single pane windows and non-insulated rusted out doors in the ABE farm offices and shop facility, this project will help achieve the iCAP goals and save funds that be used to promote other activities. The planned outcome is four new insulated walk through doors and seventeen new insulated windows that assist in achieving the goals and provide for a welcoming and efficient learning environment.
