Project Description:

The Sustainable Student Farm (SSF) was started in 2009 with a grant from the Student Sustainability Committee to provide locally grown, sustainably produced food to the campus community. The farm creates a space for students to learn about organic vegetable production, to provide high-quality, fresh food to the campus community, and to support itself financially through produce sold. This funding supports the purchase of a new tractor that will expand SSF's ability to produce a greater range of produce, increase efficiency, as well as teach students tractors skills.
