

STUDENT SUSTAINABILITY COMMITTEE

Funding Application – Step 2

Please submit this completed application, the supplemental budget spreadsheet, and any relevant supporting documentation by the deadline indicated in your Step 1 notification letter to Sustainability-Committee@Illinois.edu. The Working Group Chairs will be in contact with you regarding any questions about the application. If you have any questions about the application process, please contact the SSC Program Advisor, Micah Kenfield, at kenfield@illinois.edu

General Information

Project Name: Project Name

Total Amount Requested from SSC: Total Project Cost

Project Topic Area(s): Energy Education Food & Waste
 Land Water Transportation

Contact Information

Project Lead

Applicant Name: Kevin Armstrong
Unit/Department: SLCL / LAS
Email Address: kdarmstr@illinois.edu
Phone Number: 217.244.3241

Financial Contact *(Must be Full-time University of Illinois Staff Member)*

Contact Name: Kevin Armstrong
Unit/Department: SLCL / LAS

Project Description

Please provide a brief background of the project, the goals, and the desired outcomes:

The hope is to find a way to limit “always on” lighting in the corridors and areas that have long periods without traffic.

The goal is to successfully implement this on one floor to clearly identify process and outcome. Provide energy savings without the loss of safety or concerns thereof.

How will the project improve the sustainability of the Illinois campus and how will the project go above and beyond campus standards?

We will seek student involvement so that the data can be mined and packaged to show the savings and the return on investment for this type on implementation.

Where will the project be located? Will special permissions be required to enact the project on this site? If so, please explain and submit any relevant letters of support with the application.

This project will take place within FLB on floors that support graduate student offices. I’m the Facility Manager here and will coordinate the scheduling

Other than the project team, who will have a stake in the project? Please list other individuals, groups, or departments affiliated directly or indirectly by the project. This includes any entity providing funding (immediate, future, ongoing, matching, in-kind, etc.) and any entities that will be benefitting from this project. Please attach letters of commitment or support at the end of the application.

We will be matching up to \$5,000.00 from our ECIP awards money.

Please indicate how this project will involve or impact students. What role will students play in the project?

Long term savings on energy expenses and hopefully participants in the project at all levels.

Financial Information

In addition to the below questions, please submit the supplemental budget spreadsheet available on the Student Sustainability Committee website. Submission of both documents by the submission deadline is required for consideration of your project.

Have you applied for funding from SSC before? If so, for what project?

no

If this project is implemented, will there be any ongoing funding required? What is the strategy for supporting the project in order to cover replacement, operation, or renewal costs?

Please note that SSC provides funding on a case by case basis annually and should not be considered as an ongoing source of funding.

If needed, please also address this in the supplemental budget spreadsheet in the relevant section.

Please include any other sources of funding that have been obtained or applied for. Please attach any relevant letters of support as needed in a separate document.

Using \$5,000 of ECIP awards money

Environmental, Economic, and Awareness Impacts

In addition to the below questions, please indicate specific measurable impacts as applicable on the supplemental budget spreadsheet.

Which aspects of sustainability does your project address, and how? Does the project fit within any of the iCAP goals? If so, how does the project go beyond the university status quo standards and policies.

Not aware of this type of lighting on campus

How will the environmental impacts of your project be measured in the near and long term? What specific monitoring and evaluation processes will you be using to track outcomes and progress?

Before and after analysis

What is the plan for publicizing the project on campus? In addition to SSC, where will information about this project be reported?

We have a newsletter that reaches 9500 and would hope LAS would pick up the story. This would be handled by our Outreach and Publicity Director, Richard Partin

What are your specific, measurable outreach goals? How will these be measured?

Please be as specific as possible. .

Do you have any additional comments or relevant information to aid in evaluation of this application?

Please provide any additional information here.
